# CAPABILITIES

Wolseley Industrial Group is a leading supplier of solutions to the North American industrial market. Recognized by industry professionals as the provider of trusted products and solutions, we have built a reputation for simply delivering on our commitments day in and day out.

## INDUSTRIAL DISTRIBUTION / PVF

### Valves, Automation, Instrumentation, Steam Specialties

**Valves stocked to meet your applications** – High Pressure, Steam and Hot Water, Molten Sulfur, Acid Gas/Tail Gas, Back Pressure, Valves, Control Chocks, Pump and Compressor Discharge, High Temperature/Abrasive, Closed Vent Sampling, Autoclave Technology, Large Diameter Pipeline Valves, Pipeline Pigging, Cryogenic and Injection of Saltwater/CO<sub>2</sub>/Acid Gas.

**Actuation centers throughout North America** providing rapid turn-around for Pneumatic, Electric and Hydraulic packages (quarter turn and linear) with instrumentation and controls.

**Support services provided** with our packages include technical assistance for proper installation, drawings of automation assemblies, testing to customer specifications with documentation and valve tagging for identification and traceability.

For additional information on our capabilities, please visit our web site [www.ferguson.com/BusinessGroups/industrial.shtml](http://www.ferguson.com/BusinessGroups/industrial.shtml)

### Engineered Products

**Fuel and Petroleum Measurement and Fluid Handling Products** to meet your application for measurement, liquid transfer, safety and access equipment, injection systems, ground overfill protection and gauging systems manufactured by industry leaders FMC Technologies, Emco Wheaton, Cameron, Civacon, Safety Rack, Varec and Chemtec.

For additional information on Fuel and Petroleum Measurement and Fluid Handling capabilities, please visit our web site [www.Pipeproducts.com](http://www.Pipeproducts.com)

**Engineered Piping Systems** – HDPE: total solution for high density polyethylene applications, Teflon lined steel pipe and fittings lined expansion joints for acids and caustic applications, ¼" to 3" carbon and stainless steel fittings with 100% leak tight joints (replaces the need for welding).

For additional information on our Engineered Piping Systems capabilities, please visit our web site [www.ferguson.com/BusinessGroups/industrial.shtml](http://www.ferguson.com/BusinessGroups/industrial.shtml)

**Products to meet the needs of the Nuclear Power Industry** – Energy and Process Corporation is a MO operating under QSC 332 offering the following products, piping, structural steel, shapes, plates, fasteners, weld rod and wire, bar, machined and fabricated components with a 30 year track record supplying safety related products to the industry.

For additional information on our Energy and Process capabilities, please visit our web site [www.energyandprocess.com](http://www.energyandprocess.com)

### Turn Key Solutions

**Fuel and Petrochemicals** – Custom Fabrication: pipe line metering skids, full product loading lanes, loading and offloading skids, blending skids, additive pump and metering skids – Blending Loading and Off Loading the following products: petroleum, petrochemicals, bio-diesel & ethanol, asphalt and additives – Upstream Oil and Gas Gathering Pipeline Installation (metallic and non-metallic).

For additional information on Fuel and Petrochemical capabilities, please visit our web site [www.Pipeproducts.com](http://www.Pipeproducts.com)

#### HDPE

Custom fabrication up to 120", abrasive reduction solutions, holding tanks, manholes, splitting chambers plus additional custom solutions upon request supported by the following services: application consultation and problem resolution, application and installation training, CAD design, buried and surface installation, qualified welding upon request and fusion equipment sales and rental with technician support and maintenance across North America.

For additional information on our HDPE capabilities, please visit our web site [www.hdpe.com](http://www.hdpe.com)

## INTEGRATED SERVICES

**Integrated Services** offers outstanding supply chain management solutions for industrial facilities needing a full range of maintenance, repair and operating supplies. Our objectives focus on delivering cost savings to customers through procurement services, inventory optimization, data and reporting management, inventory replenishment and distribution services. Replenishment solutions include Kanban, Automated Supply Dispensing, Off-Site Distribution Centers, and a complete Storeroom Management and Requisition Management system. Our services include item planning and data cleansing for inventory optimization, on/off-site procurement resources, and on-site storeroom management personnel responsible for receiving, stocking, issuing and cycle counting product. Integrated Services has provided industry-leading solutions since 1989 with documented performance measurements supporting customer initiatives.

For additional information on our Integrated Services capabilities, please contact [integrated@ferguson.com](mailto:integrated@ferguson.com) and visit our web site: [www.integratedsupply.com](http://www.integratedsupply.com) .

## INDUSTRIAL DISTRIBUTION - MRO/MROP

**Industrial Distribution – MRO/MROP** distributes products to meet the majority of your direct and indirect spend product requirements including abrasives, chemicals & lubricants, cutting tools & accessories, electrical, fasteners, pipes valves & fittings, material handling, safety products among others. In addition to our vast product offering, various material management services are offered to meet our customers logistics needs.

For additional information on our Industrial Distribution MRO/MROP capabilities, please contact [mro.help@ferguson.com](mailto:mro.help@ferguson.com) or visit our website [www.fergusonmro.com](http://www.fergusonmro.com) .

# INDUSTRIAL PRODUCTS - PVF

## Pipe

### Material

Alloy  
Brass  
Carbon Steel  
Cast & Ductile Iron  
Copper  
Fiberglass  
HDPE  
Specialty Pipe  
Stainless Steel  
Thermoplastic

### Type

API line Pipe  
Continuous Weld  
DSAW  
ERW  
Exchanger Tubing  
Instrumentation Tubing  
Pressure Tubing  
Seamless Pipe

## Fittings & Flanges

### Material

Alloys  
Brass  
Carbon Steel  
Cast iron  
Copper  
Ductile Iron  
Fiberglass  
Forged Steel

HDPE  
Malleable  
Iron  
Plastic  
Stainless Steel

### Type

Butt Weld Fittings  
Cast Fittings & Flanges  
Copper Fittings  
Forged Fittings & Flanges  
Gaskets  
High Yield Fittings & Flanges  
Pipe & Swaged Nipples  
Tube Fittings

## Valves, Actuation & Instrumentation

### Materials

Bronze  
Carbon Steel  
Cast Iron  
Cast Steel  
Chrome  
Ductile Iron  
Nickel Iron  
Plastic  
Stainless Steel

### Type

Automated Valves  
Ball valves - Soft Seated, Metal Seated, Severe Service  
Butterfly Valves - Resilient seat, High Performance  
Double and Triple Offset and PTFE lined

Control choke valves  
Control Valves  
Double block and bleed valves  
Expanded gate valves  
Gate Globe and Check Valves  
Knife Gate Valves  
Pig valves  
Pinch Valves  
Plug Valves, lubricated, lined  
Pulse dampened check valves  
Regulating  
Safety Relief Valves  
Silent Check Valves  
Slab gate valves

### Steam Specialties

Condensate pumps  
Drip pan elbows  
Flow meters  
Pressure-reducing valves  
Safety relief valves  
Steam traps  
Vacuum breakers

### PVF Services

Pipe end preparation – cutting, beveling, threading, grooving  
Documentation  
Inventory, planning, optimization, and standardization  
Customized reporting  
HDPE fusion equipment rental
