Arizona and New Mexico

SIEMENS

Process Instrumentation

Flow products, pressure transmitters, temperature transmitters, recording and control products, advanced control solutions, and valve automation.

Level Products

Point Level and Continuous Level. Ultrasonic, radar, contact and non contact and Industrial belt scales

Process Analyzers

Clarifier, Thickener, Washer and CCD Mud Divers. Analyzers specializing in high-scale and high temperature applications.

Analytical Instruments

Turbidity, chlorine, sodium, dissolved oxygen, pH, ORP and other analyzers

a xylem brand

Environmental water quality monitoring

Conductivity, pH, salinity, turbidity, nitrate, chloride, salinity, resistivity, ammonia, CDOM and chlorophyll analyzers.

Temperature Sensors

Thermocouples, RTD's, thermistors, thermocouple wire, extension wire, thermowells, protection tubes and accessories.

Low Voltage Drives

Low voltage variable frequency drives. Fractional horse up to 3000 hp. Constant torque and Direct Torque Control.

Motion Control

A full line of motion drives, intelligent drives, servo motors and software.

PLCs

The AC500, AC500-eCo and AC500-XC PLC ranges provide solutions for small, middle and high end applications.

Non-Destructive Testing

ToFD inspection solutions.

Analytical Solution Sensors

Inline concentration analyzers for existing liquid processes. including chemical concentration, mixed chemicals including electrolytes, purity of hydrocarbon liquids, organic emulsions, mineral slurries for density measurement.
