REDD
Engineering & Construction, Inc.

We serve clients through uniquely prepared personnel, who are selected as individuals and as teams that possess the character strengths, knowledge, skills and experience necessary to meet project needs.

RECI can serve as independent technical consultant or design-build project manager, taking projects from concept to completion with a commitment for work and products that meet or exceed the standards of the industry. We are committed to client satisfaction in quality, budget and delivery - all provided safely for our clients, employees, the public and environment.

REDD Engineering & Construction, Inc. (RECI) continues a tradition of project leadership, quality engineering and excellent service that began seventy-seven years ago. RECI has the distinction of being the longest continuously operating engineering firm in the state of Utah, conducting business locally, throughout the Intermountain West, nationally and in remote overseas locations.

RECI has provided engineering and design services, as necessary to facilitate world-class industrial processes and facilities. Where performance is critical in meeting economic, environmental and social goals and as commonly required to comply with US & foreign government standards within existing markets. The RECI team has consistently demonstrated resiliency and consistency in delivering quality projects within scope, schedule and budget.

RECI is a full-service multi-disciplined engineering, procurement and construction company. We provide planning, management and consulting services for projects from the initial concept phase through to the operation and maintenance of plants. Projects are provided for industrial and institutional clients involving engineered processes, facilities, or technology-based products.
